About the International e-Faculty Development Programme (e-FDP)/STP

The **07-Day International e-Faculty Development Programme (e-FDP)/STP** on "**Future-Ready Healthcare Education: Transforming Health Sciences through Artificial Intelligence (AI), Computational Technologies, Research, Innovation, and Emerging Next-Generation Tools in Health Sciences**" is designed to empower educators, researchers, healthcare professionals, and academicians with the knowledge and skills required to meet the evolving demands of health sciences education in the digital era.

Scheduled from **19 July 2026 (Sunday) to 25 July 2026 (Saturday)**, this international programme provides a multidisciplinary platform for learning, collaboration, and professional development. Participants will gain insights into the transformative role of **Artificial Intelligence (AI), digital health technologies, innovative teaching methodologies, research excellence, evidence-based practices, and emerging educational technologies** in healthcare education.

The e-FDP features **eminent national and international experts** who will deliver interactive sessions, keynote lectures, panel discussions, workshops, and practical demonstrations on contemporary topics shaping the future of healthcare education. The programme also encourages networking, interdisciplinary collaboration, and the exchange of innovative ideas among participants from academia, research institutions, healthcare organizations, and industry.

This programme aims to strengthen participants' competencies in **AI-enabled teaching and learning, curriculum innovation, digital pedagogy, research methodology, publication ethics, intellectual property rights, grant writing, innovation and entrepreneurship, simulation-based education, and quality assurance in health professions education.**

By the end of the programme, participants will be better equipped to integrate advanced technologies and innovative educational practices into their academic and professional environments, thereby contributing to the development of a competent, technology-driven, and globally competitive healthcare workforce.

Target Participants

Faculty members, researchers, healthcare professionals, clinicians, pharmacists, nurses, physiotherapists, allied health professionals, academicians, research scholars, postgraduate students, and industry professionals.

This e-FDP/STP serves as an excellent opportunity to upgrade professional competencies, earn valuable continuing professional development exposure, and become part of a global network committed to advancing healthcare education through innovation, research, and emerging technologies.

Why Join This e-FDP/STP?

1. **7-Day FDP/Training certificate** beneficial for **NAAC, UGC, NBA, PCI, NMC, INC, and other accreditation and career advancement requirements.**
2. **Expert sessions** by renowned **international and national academicians, researchers, and industry professionals.**
3. Gain practical insights into **Artificial Intelligence, Research Methodology, Innovation, Digital Health, and Emerging Technologies** in healthcare education.
4. Enhance your **teaching, research, publication, and grant-writing skills** through interactive learning sessions.
5. Opportunity to **network and collaborate** with faculty members, researchers, healthcare professionals, and academicians from across India and abroad.
6. Receive a **valuable participation certificate** from SHER and APTI upon fulfilling the attendance criteria.
7. Participate conveniently in an **online mode** from your home or workplace without any travel.

Objectives of the e-Faculty Development Programme (e-FDP)/STP

The Faculty Development Programme/Training aims to:

1. Enhance the knowledge and competencies of healthcare educators in integrating **Artificial Intelligence (AI)** and emerging technologies into teaching, learning, research, and clinical practice.
2. Promote innovation, digital transformation, and evidence-based educational practices in health sciences.

3. Strengthen research aptitude by providing insights into research methodology, scientific writing, publication ethics, intellectual property rights (IPR), and research funding opportunities.
4. Familiarize participants with modern healthcare technologies, including digital health, data analytics, simulation-based learning, virtual reality, telemedicine, and AI-assisted healthcare.
5. Develop future-ready educators capable of designing learner-centric, technology-enabled, and outcome-based educational strategies.
6. Foster interdisciplinary collaboration, networking, and the exchange of best practices among academicians, researchers, clinicians, and healthcare professionals.
7. Encourage lifelong learning and continuous professional development to meet the evolving demands of healthcare education and practice.

About the Society of Health Education and Research (SHER)

The Society of Health Education and Research (SHER) is a dedicated organization committed to advancing public health through education, research, innovation, and community empowerment. Founded on the belief that informed communities create healthier societies, SHER works to bridge the gap between scientific knowledge and real-world health practices.

SHER strives to promote evidence-based health education, support high-quality research, and cultivate strategic partnerships that strengthen health systems at local, national, and global levels. Through capacity-building programs, community outreach initiatives, scientific research, and collaborative projects, the Society aims to equip individuals and institutions with the knowledge, skills, and resources required to improve health outcomes.

At SHER, we bring together health professionals, researchers, educators, students, and community leaders united by a shared mission: to enhance quality of life by promoting health equity, encouraging healthy behaviors, and fostering a culture of learning, innovation, and discovery.
