

Mr. Anand Kumar Mishra, Asst. Professor at the School of Engineering & Technology (SIET), CPM University, Kanpur. An over 17 years of experience in Computer Science and Engineering. He holds a Master's in Computer Science & Engineering and is pursuing a Ph.D. in a cutting-edge computing domain. His expertise spans Blockchain, Artificial Intelligence, Internet of Things (IoT), Machine Learning, Computer Vision, and Cloud Computing. He completed a notable Online Thesis and Travel project at IIT Kanpur, demonstrating strong practical and collaborative skills. Mr. Mishra holds prestigious positions in India, Canada, and host talks along with multiple copyrights, trademarks, and books, establishing his leadership in research and innovation. He has authored numerous research papers and book chapters in reputed national and international forums, and guided research scholars and postgraduate students. His work includes interdisciplinary and industry-academia projects on secure and intelligent systems. Recognized with multiple industry honors, he is credited to integrating emerging technologies into education, bridging theory with real-world applications, and inspiring the next generation of computer scientists.

Mr. Dharamendra Sharma is an Assistant Professor in the Department of Computer Science & Engineering at Vikram University, Gwalior. He is a passionate educator and researcher in the field of Computer Science, with over 8 years of academic experience. Holding a B.Tech and an M.Tech, and currently pursuing his Ph.D. as a research scholar, he has developed a strong foundation in advanced technologies and innovative research. His core areas of expertise include Blockchain Technology, Image Processing, Cloud Computing, and Deep Learning. With more than 15 research papers published in reputed journals and conferences, and 2 patents to his credit, he has made notable contributions to the world of emerging technologies. What truly sets him apart is his ability to simplify complex technical subjects and present them in a way that is both clear and engaging for students and scholars alike. His teaching style reflects a perfect balance of deep theoretical understanding and real-world application, making learning accessible and impactful. This book is a reflection of his dedication to advancing knowledge in cutting-edge fields, especially blockchain, and his desire to share that knowledge in a way that benefits students, researchers, and technology enthusiasts. He continues to inspire through his research, teaching, and passion for technology-driven education.

Mr. Vishal Taretiya is an Asst. Professor in the Department of Computer Science & Engineering at Vikram University, Gwalior with over 18 years of experience in teaching Computer Science. His areas of expertise include Blockchain Technology, Machine Learning, Big Data, and the Internet of Things (IoT). He enjoys making tough tech topics simple and interesting for learners. Vishal believes that technology should solve real-life problems, and his work focuses on doing just that. This book is his effort to explain blockchain in a clear and practical way, perfect for anyone who wants to understand the future of digital technology.

Mr. Ravi Kant Mishra, Asst. Professor at School of Engineering & Technology (SIET), CPM University, Kanpur, and dedicated book editor with a passion for transforming complex ideas into impactful content. Specializing in Artificial Intelligence, Blockchain and Machine Learning, he blends academic depth with editorial precision to craft clear, engaging, and meaningful narratives. Actively involved in research, student mentorship, and technical workshops, he fosters innovation, interdisciplinary learning, and future-focused thinking. His editorial work reflects a strong commitment to quality, clarity, and relevance—making him a trusted contributor to academic and technical literature. Whether guiding student projects or reviewing manuscripts, Ravi brings a thoughtful, reader-centric approach that connects knowledge with real-world applications.
